

Fetterolf Supplies Kemya with fast acting Line Blinds

Published: May 27, 2015 12:54 p.m. ET

AL-JUBAIL, Saudi Arabia, May 29th, 2013 – Fetterolf Corporation supplied the Sabic Al-Jubail KEMYA Plant with 25 ASME pressure class 150# and class 300# Cam-Slide line blinds, for KEMYA's Saudi Elastomer Program, aimed at introducing a broad range of chemical rubbers, Butyl rubber, Polybutadiene, thermoplastic elastomers, and more. Fetterolf supplied Cam-Sets of various sizes, ranging from 1" to 14" respectively.

One of the key functions of the line blind valves is to enhance safety. They help prevent product waste, contamination, fire hazards, and the leakage of toxic substances into the environment. Line blinds accomplish this purpose by ensuring 100% isolation of hazardous media within pipelines used in chemical manufacturing.

Fetterolf's patented Cam-Slide line blinds come equipped with spectacle plates with thickness of equal proportion to or surpassing ASME and API engineering standard sizing, rendering them materially safe. Moreover, the Cam-Slide's body bolts are tack welded, translating to an inability to be inadvertently removed or loosened. Simultaneously, the Cam-Slide line blinds can be operated fast and conveniently from one side only and without requiring lifting equipment or special tools.

Given KEMYA's record of 23 million work hours within 20 years, all without a Lost Time Incident for employees, KEMYA strongly values valves complying with strict safety requirements. KEMYA's purchase of Fetterolf's Cam-Set evidences Fetterolf's ability to deliver safety and high quality to their operations. The Fetterolf Corporation has supplied line blinds to many Petrochemical plants such as Dow, Evonik, DuPont, Formosa Petrochemical and more, underscoring Fetterolf's ability to deliver.

About Fetterolf: Fetterolf Corporation (www.fetterolfvalves.com) is a global manufacturer of valves for the chemical, petrochemical, oil, gas and off shore industries. With over 1 million valves delivered to over 60 countries in over 45 years, Fetterolf has an extensive client list, which includes but is not limited to BP Chemical, Exxon Chemical, Dupont, Merck, Mitsubishi, Chevron, Shell, Sabic, and more.
